Recipe unlocking system

OVERVIEW

- This system introduces Crafting Power (CP) and a Mastery system for advanced tiers, ensuring a strategic and progressive unlocking mechanism
- **Recipes Interface**: A dedicated tab within the player menu that displays all crafting recipes in the game, clearly indicating which recipes are locked and which are unlocked.
- **Crafting Power (CP)**:
    - A new variable essential for unlocking crafting recipes early game.
    - Players earn CP by crafting an item for the first time.
- **Overview**:
    - From tier 1 to 6: Players unlock new recipes by unlocking a new tier
    - From 7 and beyond: Players spend CP or Mastery Point (MP) to unlock new recipes

- 

UNLOCKING RECIPES

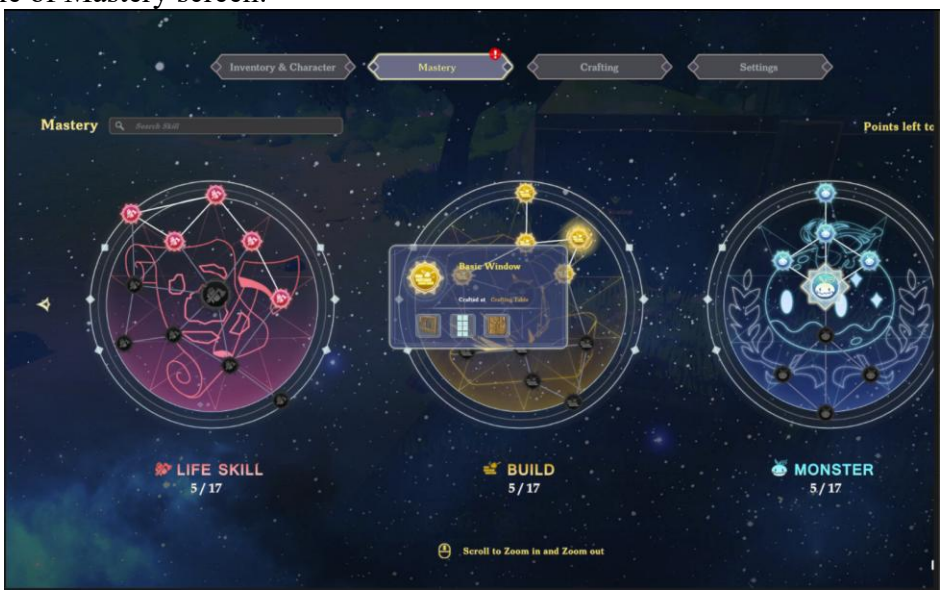

- **Note**:
  - Unlocking a new tier does not deplete the player's total earned CP; it signifies progress toward the next tier.
- **Tiers 1 to 6**:
  - Unlock new recipe:
    - Players automatically unlock all recipes within an unlocked tier.
    - The player can unlock more recipes by advancing in the tier track.
  - Unlock new tier:
    - Accumulating a certain amount of CP unlocks each successive crafting tier.
    - *For each CP accumulated, it increases the player's current available CP. The line that shows player-unlocked tiers goes further down the tier line*
    - When the line fully goes through the tier, the player unlocks that tier
    - Example: If crafting any item awards 5CP. Completing all items in Tier 1 (2 items) yields 10CP, thus unlocking Tier 2.
  - Note:
    - Each tier unlock condition (how much total earned CP is required) can be deference and needs to be exposed to the designer
    - Each item needs its value of how many CP it gives when first crafted
    - Each recipe has its own cost to unlock
- **Beyond Tier 6**: **Introduction of the Mastery System**
  - The Mastery system comes into play after Tier 6, with all subsequent tiers unlocked.
  - **Mastery Points (MP)**: Use for Masteries system
    - Act as a new metric for unlocking advanced crafting recipes.

        - Recipes needing MP for unlocking will show this requirement upon mouse hover.
    - Starting from Tier 7, some recipes are unlocked using Mastery Points (MP), while others can still be unlocked with CP.
    - *CP can now be spent to unlock new recipes*.
    - Players click and hold on the item to unlock the recipe

UNLOCK DETAILS

- **Interactive UI Elements**:
    - Hovering over any recipe displays its unlock criteria, whether it requires CP or MP. This ensures players have clear information on how to progress and unlock further crafting capabilities.
    - 

    - 

- Clicking an MP-required recipe shifts the display to the Mastery tab, with the recipe in question highlighted for quick access.
- Example of Mastery screen:
  - 

- Click and hold on a CP-required recipe will start filling up the box after it fills, the recipe is unlocked. If clicks on the recipe the player doesn't have enough points to pay the cost, nothing happens
- Example:
  - 

- **Optional:**
  - We can have a line after tier 7 in the middle to indicate all the right ones will require MP while all the left ones will require CP

Additional Features

- **Visibility of Recipes**: The system shows all recipes upfront, allowing players to plan their progression strategy.
- **Progression Feedback**: Players receive visual and textual feedback on their progress, including CP or MP gains and new tier unlocks.
- **Balance Considerations**: The CP and MP requirements for unlocking recipes and advancing through tiers are designed to offer a balanced challenge, encouraging steady progression and strategic planning.

DEVELOPMENT DEPENDENCIES

Tech Team Dependencies

Click here to expand...

- Craft Power variable:
    - Each buildable item has this variable, this is the amount of CP given to the player when the player builds the item for the first time. This needs to be exposed to designers
    - Need to track the amount of CP the player has
    - Some recipes need CP as a cost to unlock. This needs to be exposed to designers
- UI:
    - Need function to transit from the Recipes screen to the Mastery screen and highlight the recipe chosen
    - Players unlock recipes by clicking and holding the mouse click on the recipe they want to unlock
    - UI process when a player unlocks a new recipe
    - The hover screen needs to show item details and the cost of the recipe
    - Notify when the player reaches a new crafting tier
- Other:
    - Recipe system: the player can only craft an unlocked recipe
    - Checking and managing how many CP players have
    - Trigger Mastery tutorial when reaching tier 7

UI/UX System

Click here to expand...

- Every recipe needs an icon for the recipe screen
- Requesting new Recipes screen:
    - Players access this screen by opening the menu and pressing the "Recipes" tab
    - Show every recipe in the game
    - Each line shows from 1 to 6 recipes depending on the tier
    - Show tier tracking line
    - Show what recipes have been unlocked
    - Show how many CP players have
    - Scroll bar to get to the bottom of the page
- When the cursor hovers on a recipe, a small window appears and shows item details (including the cost to unlock this recipe)
- UI process of unlocking a recipe
- Transition when clicking on an MP cost recipe, the screen transit to the Mastery tab
- Notify when the player reaches a new crafting tier
