Behaviour States 8

OVERVIEW

Spikes Master is a huge zombie with spikes coming out of his body which make him very hard to hit and get close.

He uses his Spikes as a weapon and because he lives in a chemical factory, absorbed lots of poisons so his Spikes can regrow in a short time when it breaks.

Along with the Spikes, there are 4 special spikes on his shoulders and knees which is consider as his armour to block damages.

He's a boss in his area so he will not appear outside of the place until the player found him.

LOCATIONS

- Factories
- Chemical areas
- Containers and boxes around to block the places and also used as platforms for player to parkour.

VISUALS

Same body size as the Wrecking ball boss with Thorns all over around the body and 4 big spikes at a specific location made it look like horns. (A much more muscular "Drowner" with more spikes on the body should be a good example).

(Those images generate by AI and only for Reference purpose)

His skin is thick and connected with the thorns which works as an armour => break the spikes will also break the skin and his armour.

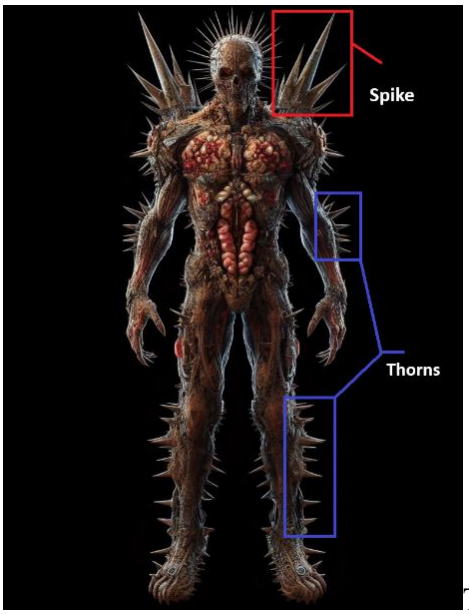

CORE GAMEPLAY FEATURES

MOVEMENT

- Same running pose with the Wrecking ball but this Freak mostly do charge attack like the Charger.
- Charge attack can be stopped and change direction instantly at player.
- After using his Spikes attack, the freak will slow down and acts like Wrecking ball, waiting for the Spikes to regrown.

COMBAT ATTRIBUTES

- Small Spike the freak are only used for an explode attack (like Drowner explode)
- 

These Spike should have clear visually for player to detect them such as avoid being to close to the freak when these Spike are still there. => Can even change the size of the freak after breaking the Spikes for more visual notice => Imagine a fluffer fish)
- Regenerate Thorns and spikes are this freak specialty.

SPECIAL FEATURES

- **Spikes regeneration**
    - Spikes after an explode attack will regen in X seconds.
    - Spikes can't be break by the player.
    - Spikes regen faster when the freak is at the chemical area.
- **Thorn skin regeneration**
    - Thorn skin are the freak's armour and it keep the freaks invulnerable.
    - Thorn skin can be break piece by piece by the player.
    - Thorn skin more time to regen than Thorns.

GAMEPLAY EXPERIENCE

PHASE 1

The Spikes Master act slow at this phase for player to learn its move set and acknowledge the regenerate spikes as well as the Spikes.

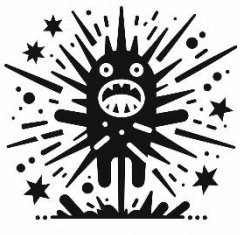

NORMAL ATTACK

	Normal melee attack: Using arms and swing at player
	Throwing rocks at player

CHARGE ATTACK

	Same behaviour as Charger with much more damage
	Charge at the wall for a certain amount of time cause the freak to be stun and break it Thorns skin.

SPIKES EXPLODE ATTACK.

	Explode every Spike on its body as an AOE attack. Same explode effect as the Drowner explode and these Spikes are not projectiles. • Spikes take time to regen.

PHASE 2

The freak charges at a broken wall and open a new area cover with chemical around.

Chemical are separated in some place not all over the area. The freak regenerate faster when he's inside this chemical area.

Player can deal with the environment first to stop the freak from this advantage => parkour to target places and trigger the switches to turn on some fans and reduce chemical area.

After X seconds, the Freak will do a jump attack to the centre of the area and refill the chemical again. => The player can parkour again to turn on the fans.

CHARGE ATTACK + SPIKES EXPLODE ATTACK.

- At the end of a charge attack, the freak also does a Spikes attack continuous.
- Spikes at this phase are break after X attacks instead of 1.

RANGED ATTACK

- Shooting spike from his hand => faster than using rocks and precisely.

HOW TO DO DAMAGE TO THE FREAK

- The freak only receives damages when its thorn aka armour is broken.
- Thorn armour can be destroyed by doing directly damage to them.
- The freak can also receive damage at the breaking thorn location.
- Break all the Spike will also break the freak's armour => the freak now is stun for X seconds => this is the time when player can do massive damages at any location on the freak's body till these spikes are regen fully.

PLAYER SYSTEM INTERACTIONS

BASIC SYSTEMS

- Melee attack when the freak has Thorn will backfire the player.
- Spikes at higher positions of the freak require player to do parkour attack (jump to higher platform and attack).
- Thorn explodes attack can't be block or dodge or deflect => Player can only hide from this attack using obstacle.

FURY

- **PLEASE NOTE, this is all dependant on how the fury system design evolves. Interactions will need to be revisited once the final design of fury abilities are settled upon.**
- The player now can-do damage to the freak even when the freak's spikes and Thorns are still there.
- The player still received damages from the freak but not much.
- Spike attack and Charger attack still effect player unless he uses Carapace (Charger) skill.
- Player can break the freak's Spikes also if he does damages directly to the Spikes in fury mode.

FIREARMS

- Shooting the freak from a distance are much safer than doing melee attack because of this freak specialty of deflect melee damages.
- Shotguns should do best damage to the spikes; these are the top priority targets to break so this gun is the best option.
- Guns can also use for trigger explosive objects around the area as the Freak would lose his Spikes when he receives explode damage. (Explosive objects can be put around the area and on higher ground for player to use)

BEHAVIOUR STATES

Please note, this is not an exhaustive list and will be further refined once we have access to the engine and can fully evaluate other creatures.

State	Description
Combat Move / Flanking	The creature should be circling the player ready to attack.
Chase	The creature has targeted the player and races after them
Charge attack	Preparing then speed up and charge at player (Charger example). He can change direction instantly to chase player but only 1 or 2 times in 1 charge attack.
Arm Swing	Swing both his arms around at the player if he gets close, can be used as a combo after using charge attack
Uppercut	Punch at player to knock him down
Arm combo	A mix of swinging arms that toward player position

State	Description
Explode Spikes	Flexing his muscle 3 times then stand straight up and bursting out his Spike (must be clear and slow enough for player to react)
Range attack 1	Picking up rocks and throw at player
Range attack 2	Raise his arm then shoot out Spikes at player
Jump attack	Bend down for 2 seconds then jumps at the target location
