HCMC, Vietnam linkedin.com/in/sonquocng

PROFESSIONAL SUMMARY

Experienced Senior Game/Tech Designer with a track record of delivering exceptional gameplay experiences. Adept at understanding player psychology and committed to pushing the boundaries of interactive entertainment. Ready to contribute creative leadership to your team.

PROFESSIONAL EXPERIENCE

2026 — NOW

3C Designer / Virtuos — Kuala Lumpur Studio (Remote)

Project: Unannounced title — conversion of a third-person shooter into a first-person shooter.

- Camera: Redesigning the camera from third- to first-person — FOV, eye height, ADS transitions, recoil and camera shake.
- Character: Reworking locomotion and movement feel for a first-person view, keeping traversal readable without a visible character body.
- Controls: Re-tuning aim and input — sensitivity and response curves, dead zones and aim assist for controller and mouse & keyboard.
- Cross-team Collaboration: Working with Animation, Combat Design and Engineering to adapt first-person arms, weapons and gameplay systems to the new perspective.

2026

Senior Game Designer / Prime Tech

- Owned the full game design lifecycle for globally scaled Casual/Hyper-Casual Puzzle & Sorting titles, ensuring high product quality from concept to Live-ops.
- Designed core mechanics and progression systems for sorting/logic games, focusing on game flow, difficulty curves, and meta-progression (rewards, missions, events).
- Balanced in-game economy and pacing to maximize player retention (D1–D7 RR) and engagement, utilizing a data-driven approach to refine game balance sheets.
- Optimized monetization models by integrating a hybrid of IAP, Interstitial, and Rewarded Ads to increase LTV and support UA scaling.
- Collaborated with cross-functional teams (PM, Art, Engineering) to translate market trends into fresh puzzle mechanics and high-potential game concepts.
- Maintained comprehensive GDDs and Feature Specs, ensuring clear communication of UX game loops and technical requirements.

2026 — NOW

Technical Designer / Big Dumb Game (Freelance)

Project: Undisclosed AA title (In development).

- Core Design: Leading the design of core systems, gameplay mechanics, and character ability trees for a high-fidelity AA experience.
- Technical Execution: Directly implementing complex gameplay features using Unreal Engine 5, ensuring modularity and performance.
- Balancing: Establishing tight balance between game systems and character stats to ensure a polished, engaging experience.
- Prototyping: Rapidly prototyping new features and refining core loops to enhance player engagement and "game feel".
- Cross-team Collaboration: Collaborating with Art and Engineering teams to bridge creative vision with technical feasibility, ensuring high-quality feature delivery.

2019 — 2026

Senior Game Designer / Virtuos Sparx* — HCMC Branch

UNITY GAME EXPERIENCE

- Developed core mechanics, character abilities, and level designs for **Mahokenshi** (Unity).
- Collaborated on UI/UX, including card elements and level layouts.

INSOMNIAC IN-HOUSE ENGINE EXPERIENCE

- Set-dressed environments for **Marvel's Wolverine**, ensuring they did not interfere with gameplay and that gameplay intention was preserved and translated visually to the player.

UNREAL GAMES EXPERIENCE

- Integrated gameplay, cinematics, mechanics, and levels for **Little Hope** and **House of Ashes**.
- Implemented branching narrative systems to enhance immersion.
- Built prototypes and gameplay features using Unreal Blueprints.
- Created environmental storytelling, prop placement, and camera work for **SpongeBob SquarePants: The Cosmic Shake**.
- Contributed to set-dressing and cinematics, enriching the story and player experience.

2018 — 2019

Tester / PKH JSC.

- Identify defects and bugs in web and mobile applications.
- Conducted functional, compatibility, and regression testing to ensure that applications meet quality standards and perform optimally across multiple platforms, devices, and browsers.
- Utilized various testing methods to identify issues and provide feedback to development teams.

2018

Thesis

- Developed a chatbot for International University Facebook page using Python.

PROJECTS TIMELINE

3C DESIGNER — 2026 — NOW

Unannounced TPS → FPS conversion

Studio: Virtuos Kuala Lumpur (Remote)

- Redesigning camera, character and controls (3C) for the move from third- to first-person.
- Tuning FOV, ADS, recoil and aim feel for controller and mouse & keyboard.
- Adapting locomotion and traversal so movement reads clearly in first person.

UNREAL ENGINE 6 · CLAUDE

ENVIRONMENT ARTIST — 2025

Marvel's Wolverine

Client: Insomniac Games

- Set-dressed environments.
- Ensured set-dressing did not interfere with gameplay.
- Preserved gameplay intention and translated it visually to the player.

INSOMNIAC IN-HOUSE ENGINE

TECHNICAL DESIGNER — 2025

Undisclosed 3rd person shooting game

- Responsible for system design, mechanic design, and character ability design.
- Implemented the majority of gameplay mechanics and abilities.
- Focused on multiplayer functionality and maintaining balance between systems and characters.

CONFLUENCE · EXCEL · FIGMA · UNITY ENGINE 5

GAME DESIGNER — 2024

Undisclosed survival game

- Designed player progression systems to balance challenge and long-term engagement.
- Developed core survival mechanics including crafting, resource gathering, and base-building.
- Created monster capture and taming systems to expand strategic gameplay.
- Collaborated with developers to refine game balance and integrate mechanics into Unreal.

CONFLUENCE · EXCEL · FIGMA · UNITY ENGINE 5

TECHNICAL DESIGNER — 2024

undisclosed 3rd person game

- Designed the boss character's move set and combat behavior.
- Structured and balanced a 3-phase boss fight with distinct mechanics for each phase.
- Implemented the boss's behavior and decision making using Unreal Behavior Trees.

CONFLUENCE · EXCEL · FIGMA · UNREAL ENGINE 5

TECHNICAL DESIGNER — 2023

BloodLoop

Client: 7 Digital Labs

- Designed and balanced core game mechanics and character's abilities.
- Worked on characters design and weapons.
- Created and implemented character abilities in UE5.

CONFLUENCE · EXCEL · MAYA · UNREAL ENGINE 5

GAME DESIGNER — 2022

Mahokenshi

Client: Game Source Studio

- Designed and balanced core game mechanics and character abilities.
- Developed level layouts and challenges.
- Created and implemented character cards and UI elements in Unity.
- Worked on quest design and integrated character cards into gameplay.

CONFLUENCE · EXCEL · UNITY ENGINE

CINEMATIC DESIGNER — 2021

Marvel's Midnight Sun

Client: Firaxis Games

- Implemented animation and camera placements from Maya into Unreal Sequencer.
- Ensured prop placement did not interfere with cutscenes.
- Managed character spawning and ensured all effects were properly placed and aligned with the cutscene.
- Collaborated with artists to resolve issues with animation and prop placement.

MAYA · UNREAL ENGINE 4

CINEMATIC DESIGNER — 2021

SpongeBob SquarePants: The Cosmic Shake

Client: Purple Lamp

- Worked on camera angles and shot composition for cinematic sequences.
- Assisted in set-dressing to create immersive game environments.
- Collaborated with the team to ensure a visually engaging game world.
- Contributed to the creation of cinematics that support the game's narrative.

MAYA · SUBSTANCE DESIGNER · UNREAL ENGINE 4

DESIGN INTEGRATOR — 2019 — 2020

Little Hope and House of Ashes

Client: Supermassive Games

- Integrated gameplay elements, cinematic aspects, and mechanics.
- Worked on level layouts and interaction designs.
- Implementation of the branching narrative system.

UNREAL ENGINE 4

SKILLS ACQUIRED

- Unity & Unreal Game Engine
- Creative & Analytical Thinking
- Collaboration & Communication
- Technical Proficiency
- Project Management
- Industry Passion

BACKGROUND EDUCATION

International University

B.S. in Computer Science and Engineering · 2015 – 2019

- Scholarship 30%
- IELTS 7.0
- GPA 78.5/100
